Quarterly Newsletter - Issue 60 - February 2022

INTRODUCING CITY ADMINISTRATOR KRISTI NORTHCUTT

As the calendar turned to 2022, I was honored and privileged to be sworn in as your City Administrator – an oath that hasn’t been recited in Lindsborg for more than 23 years. That’s not a fact that I take lightly; it was a monumental moment for me as I stood before the Mayor and City Council and committed to a long, exciting future here. Of course, it will come with some bumps and bruises along the way, too (what job doesn’t?). I grew up watching and learning from this community, and while it’s had its ups and downs, the city is in a position today to launch into an upwards trend of victories. Together with my team of talented and passionate staff members, we have big goals and dreams for Lindsborg, and we want you to come alongside us as we make this the “Community of Choice” for generations to come.

Many of you know me, but for those who don’t, here’s a little background. I grew up in Salina, with my parents serving USD 305 for their entire careers. I earned a dual BA in Communications and English from Bethany College, and after a short stint at the Kansas Cosmosphere & Space Center, had the opportunity to return to Bethany to serve in the Advancement and Alumni offices for many years. I then worked for a short time in McPherson before taking a role at the Salina Public Library, and later moved to Johnson County where I was appointed to the team to build the K-State Olathe campus in 2011. Once the campus was built & operational and after finishing my Masters in Organizational Leadership in 2014 (from Baker University), I took a leap of faith to a community management role in the master planned community of Anthem, Arizona (north Phoenix suburb), where I served from 2014-2021.

My family and I are excited to be back in the Midwest, and we look forward to serving this wonderful city. Our children already are enjoying frequent visits to our city’s amazing coffee shops and downtown stores, and we are anxious for the many upcoming events.

As we move deeper into the year, I look forward to meeting many of you in person, and working alongside our dedicated community partners to move the strategic goals and comprehensive plan for Lindsborg to the next phases. There is much work to be done; but if there’s one thing that I’m sure of in my short time here, it’s that

outstanding people are in place to make it happen. We’re undoubtedly going to face challenges this year and in the years to come, but our VISION for Lindsborg is to ensure that people know that we’re not only a community of *choice*, but a community that *cares*. We intend to demonstrate that *vision* with our thoughts, words, and deeds each day that we come to work.

We invite you to help us celebrate the accomplishments of 2021 in this edition of the newsletter, and to commit to an exciting and productive new year together.

-- Kristi

VISION – n.

1. the faculty or state of being able to see.
2. the ability to think about or plan the future with imagination or wisdom.

CITY ANNOUNCEMENTS

CITY HALL

Introducing our new Mayor and City Council Members! These members of our governing body were sworn in on December 6, 2021. Their contact information is available below. Congratulations to these new members.

Clark Shultz
Mayor

Tanner Corwin
Ward 1

John Presley
Ward 2

Blaine Heble
Ward 3
(Re-elected)

Corey Peterson
Ward 4

ONLINE BILL PAY IS AVAILABLE

Please visit www.lindsborgcity.org for more information. There is a link at the bottom of the website's homepage that will take you to the online bill pay center. Please call City Hall at 785-227-3355 if you have any questions regarding online bill paying.

REGISTER THE PUPS

Don't forget to renew your dog license(s). The cost is \$5.00 for spayed or neutered and \$25.00 if the dog is not spayed or neutered. Call City Hall to inquire or to set up an appointment to go in and purchase a 2022 license for your pup.

Council Member Contact Information

ADMINISTRATION & FINANCE

- 2021 Audit report completed and the City conforms to established accounting standards and in compliance with State of Kansas budget statutes.
- Development and adoption of the Comprehensive and Strategic Plans, which won a statewide planning award.
- Long-time Finance Director Larry Lindgren retired; David Hay was hired as the Finance Manager.
- Long-time City Administrator Greg DuMars retired; Kristi Northcutt was hired in November.
- New Sprout House project became a reality; the childcare center was funded with the Industrial Revenue Bond, Community Service Tax Credits, and a large grant from the Patterson Family Foundation. To date, \$3.0 million has been raised.

Sprout House progress photo as of January 27, 2022. Construction on this new facility should be complete in June 2022. A groundbreaking ceremony took place in June 2021.

COMMUNITY DEVELOPMENT

- New homes built at Stockholm Estates.
- Cow Creek floodplain management project began.
- Progress made on Alma Swensson Memorial Garden.
- Permit applications moved online; mapping software updated and moved online.
- Alignment of department priorities and initiatives to the 2021 Comprehensive and Strategic Plans.
- Ongoing professional and educational development.
- Community Development Director Gary Shogren retired; Jordan Jerkovich was hired to fill the position.

RECREATION

- Implemented Jarvis Online, an online registration program, and in 2021 it supported 90% of the recreation registrations. This program has made registration, communication, and reporting so much more efficient for staff and families.
- Multiple new recreation classes were added in 2021. These classes included Princess & Ninja Camps, Yoga, Bike Riding, and Scavenger Hunts and many more.
- Lindsborg Recreation joined the Mid Kansas League for youth sports, which allowed for more competitive games with teams in the surrounding area.
- Four pickleball courts were added to Riverside Park.
- Memberships in all areas of Lindsborg Recreation increased.

PUBLIC WORKS

- Completed research and development for a plan to move to an Advanced Metering Infrastructure System for electric and water metering.
- Completion of the infrastructure for Stockholm Estates and began the installation of new electric and water services.

STREETS

- Completed the repaving of the 600 through 900 blocks of N. Main Street.
- Continued the crack sealing program on city streets.
- Continued working on flood mitigation and floodway maintenance.
- Continued tree trimming above street right of way.
- Maintained the Boneyard/Composting Program.
- Brian Shuttleworth was hired as a streets maintenance worker.

WATER

- Continued replacement of residential water meters and commercial registers.
- Continued the water valve exercise program as hydrant maintenance and flushing.
- Purchase of a new duty truck and transfer of the utility bed to the new chassis.
- Replacement of 460 feet of failing waterline from the primary well.
- Continued the replacement of non-functioning water valves.

WASTEWATER

- Continued the sewer line maintenance program cleaning 10,500 linear feet of sanitary sewer lines.
- Completed the rehabilitation of the #2 Clarifier.

ELECTRIC

- Completed the installation of the new electric system for Stockholm Estates.
- Continued the conversion of high-pressure sodium streetlight to LED technology.
- Continued in-house tree trimming of Zones 4 & 1.
- Continued with pole wrap animal mitigation measures.
- Completed research for an Advanced Metering Infrastructure System.

PUBLIC SAFETY

- Officer Terry Reed was promoted to rank of Sergeant and in Sgt. Scott Wolf was promoted to the rank of Lieutenant.
- Officer Eric Kruckenberg assisted Bethany College student teachers with completing the fingerprint requirement for state certifications.
- Chief Michael Davis participated in the “Rules of the Road” portion of the Driver’s Education class at Smoky Valley High School; safety, drug and alcohol identification and abuse at Bethany College; and mandated reporter requirements at Sunflower Terrace.
- Participated in a law enforcement panel for the Smoky Valley High School Government Class.
- Officer Kruckenberg emceed the D.A.R.E. graduation ceremony.
- Lexipol recognized Lindsborg PD for achieving Gold Level, for onsistently and effectively disseminating policies to officers, issuing timely policy updates as laws change, and ensuring our officers are trained on those policies. Lexipol is the nation’s leading provider of policy, training and wellness support for first responders and public servants.

ACCOMPLISHMENTS continued from page 4

FIRE

- To provide immediate access to our Fire & EMS personnel and limit damage caused by fire and smoke, worked collaboratively with Knox Box to provide options for local organizations to place box access systems at their locations.
- Received new thermal imaging cameras to help detect hot spots in places where the human eye cannot see.

EMS

- Transition from an all-voluntary ambulance service to a full-time contracted EMS service (AMR).
- Two EMTs completed additional schooling and training to obtain certification as advanced emergency medical technicians.
- Hosted a food drive in preparation for those who may be less fortunate during the holidays.

PARKS DEPARTMENT

- Repaired main structure for the gazebo at Riverside Park.
- Rebuilt the Memorial Garden at Riverside Park.
- Repainted and repaired various parts of the pool.
- With help from all departments, volunteers, and donors, we have begun installation of the Alma Swensson Memorial Garden at Swensson Park.
- Started to build a new primitive trail section for the Välkommen Trail.
- Named a Certified Tree City USA for the 36th year.
- Partnered with CVB to plant a community native wildflower garden to attract monarch butterflies.
- Received community outreach from the local school system and Tree Board to rack up over 12 hours of community volunteer hours from over 65 people.
- Replaced four downtown street trees.
- Began a downtown tree maintenance schedule.

CONVENTION AND VISITORS BUREAU (CVB)

- Lindsborg named “Most Hallmark Movie-esque Small Town” by *Travel Awaits*.
- Used 10,000 visitor guides, with no change from a “normal” travel year.
- 14,500 original-artwork postcards were distributed.
- The Visit Lindsborg website saw 42,000 unique users logging in for 52,000 sessions.
- The Visit Lindsborg Facebook page had significantly more page likes and engagement per capita than other communities across the state.
- Creation of 49 new “Live from Lindsborg” videos along with other short videos to reach new audiences on social media, with more than 53,000 views.
- As a partnership with Soderstrom Elementary, planted a pollinators garden along the Välkommen Trail.
- Transient Guest Tax finished the year with the highest quarter of collections on record since the CVB began keeping records in 2005.

SUNDSTROM CONFERENCE CENTER (SCC)

- 77 total events hosted, serving 3,275 guests with 5 cancelled events due to the COVID-19 pandemic.
- SCC Staff successfully hosted Hyllningsfest Smorgasbord and Bethany College Alumni events, simultaneously, bringing over 1,000 guests through its doors during the two-day festival weekend.

Lindsborg Welcomes Visitors!

There is so much to see and learn!

Despite the changes and uncertainties of travel over the past two years, the Lindsborg Convention and Visitors Bureau has not changed our vision for helping to create a successful community. We have connected with people and organizations outside of our office continually to encourage travel and commerce within the Smoky Valley. We have worked hard to communicate with local business owners where they can find resources to help buoy up their businesses during this difficult season. Staff has offered marketing information, ideas, and assistance to any and all that have approached the office with questions or a need for our help. We truly believe that it takes all of us to raise the tide and we continue to work hard for the community we so love. The people. The businesses. The events. The vibe. We wouldn't want to be anywhere else.

In the top right photo, CVB Director Holly Lofton explains the benefits of tourism in Lindsborg to fourth grade students. The photo to the right is the CVB Visitors Guide. The full version can be viewed at:
https://www.visitlindsborg.com/media/Visitors%20Guide_2021_site_email.pdf

Travel Industry Association of Kansas (TIAK)

The TIAK Board of Directors is a 27-member board that consists of the six TIAK Executive Committee members including the TIAK President, President-Elect, Vice President, Secretary, Treasurer and Past President, fifteen board members with staggered three-year terms and six regional representatives. The board also includes Ex-officio Members comprised of tourism partners.

AVOIDING CRIME IN THE NEW YEAR

During 2021, crime in general showed a significant increase throughout our country. While crime was relatively low for us here in Lindsborg, that is no reason to let your guard down when it comes to avoiding becoming a crime victim in 2022. Make no mistake about it; criminals are working hard to take away your money and valued possessions. Vigilance coupled with taking simple steps throughout your day will help reduce your chances of being targeted by criminal activity.

The most prominent property crimes in our community in 2021 were thefts, criminal damage to property, and burglaries. Nationwide, one of the most prevalent property crimes was auto burglaries. Over 80% of reported car burglaries involved the loss of valuable items that were left in plain view by owners while away from their vehicles—items such as purses, laptops, cell phones, designer sunglasses, GPS units, backpacks, and packages were left on seats, floorboards, or on the dash. In our community, many of the burglaries occurred because doors to vehicles were left unlocked—this is referred to as “Crimes of Opportunity.” This makes it extremely easy for criminals to obtain their loot. You can avoid becoming a victim by NEVER leaving any items in plain view while away from your vehicle and NEVER leaving your vehicle unlocked.

While not a major crime problem in Lindsborg, residential burglaries have a profound impact on the homeowner, family, and the entire neighborhood. In addition to the loss of personal possessions and private documents, the psychological effects of having your privacy violated in our safest place can last for a long time. Unlike what movies and TV may portray, most residential burglaries occur during the daytime, not at night while residents are inside the house. Residential burglars look for the least challenging locations when selecting a target. An open window or overgrown shrubbery are an invitation for criminals to easily access your home. Some burglars will knock on the door to make sure no one is home, and then either gain access by prying or kicking a door or make their way to the side or back of the house for undetected access usually through unsecured doors or windows. The use of an alarm system and the conspicuous posting of alarm company stickers and signs throughout the exterior may deter a criminal from taking a chance of a loud alarm alerting nearby neighbors. There are very inexpensive wireless do-it-yourself alarm kits sold online and in home improvement stores that can help protect your home.

Finally, fraud and unauthorized computer access continues to impact victims for a long time after the crime is detected. Make sure to change your passwords frequently, using letters, numbers, and symbols to compose passwords and pass phrases. Also, shred all bills and mail with your personal information, and make sure to SECURE YOUR HOME OR BUSINESS WIRELESS INTERNET CONNECTION AND NETWORK. An unsecured wireless connection will open the door for criminals to access your system for the purpose of theft and fraudulent activity.

Most importantly, never think twice before calling the police when you see or hear something suspicious.

As I speak with people in the community I sometimes hear “I didn’t want to bother you with something that small, I know you have bigger things to deal with.” In our view, small things lead to big things, and suspicions many times lead to the capture of criminals—so please, call us any time and we’ll be glad to assist!

-- Chief Davis

As we move into spring and the weather gets warmer, the season for new construction and home improvements will be upon us. As you begin to consider your next project, you might be wondering if you need a permit or license. If so, here are some answers to some Frequently Asked Questions (FAQs) about permits and licenses.

DO I NEED A PERMIT?

YES

- New construction over 120 sq.ft. (e.g. large shed, brand new home, etc.)
- Building addition, enlargement, or remodel
- Demolitions
- Electrical work
- Plumbing
- Fences
- Signs

NO

- Aesthetic repairs or renovations (e.g. sheetrock, painting, wallpapering)
- Shingling a roof
- Pouring a driveway
- New construction under 120 sq.ft. (e.g. a small shed)

DO I NEED A LICENSE?

Electricians and plumbers need to be licensed by the City to work in Lindsborg. General contractors do not need to be licensed by the City to work in Lindsborg. Businesses do not require a license to operate in Lindsborg.

How do I apply for permits?

You can apply for permits online by visiting lindsborgcity.org or by scanning the QR code below.

HOW DO I APPLY FOR LICENSES?

You can apply for licenses by calling the city at 785-227-3355 or by visiting City Hall at 101 S Main St.

HOW DO I KNOW WHAT ZONE MY PROPERTY IS LOCATED IN?

The City of Lindsborg Zoning Map can be found online at lindsborgcity.org/departments/cd

APPLY FOR BUILDING PERMITS BY SCANNING THE QR CODE!

STILL HAVE QUESTIONS?

Email lindsborgcd@lindsborgcity.org

Phone 785-227-3355

WHERE CAN I GO TO CHECK BUILDING REQUIREMENTS?

The easiest way to check and review building requirements is by viewing the Lindsborg Code of Ordinances online at library.municode.com and searching for Lindsborg. You can also visit lindsborgcity.org/departments/cd

Välkommen Primitive Trail

The Parks Department has started working on a primitive walking trail that loosely follows the Välkommen Trail master plan. The new location is on the old rail bed where the Välkommen Trail terminates at the southwestern point by the K-4 highway. It begins here and runs south to Svensk road. The new section is a red line in the aerial photograph. This is the first part of a longer section running about .32 miles. The proposed ending point for 2022 is located on the map with an "X".

The Välkommen Trail is the main artery for foot and bicycle traffic alike. It provides safety and easy access to all parts of the community. The primitive trail adds a different dimension to the trail system and is an asset in trail diversity. This primitive trail increases the already lengthy trail system by 32 miles, so the Välkommen Trail length is 4.6 miles.

The Parks Department also is teaming up with Community Development, and the Convention & Visitors Bureau to work on trail development. Recently we have been engaged in meetings conducted through the Sunflower Foundation; these meetings include networking with other trail advocates. These particular Zoom meetings involve a Trail Champions Cohort that gives us access to high-level expertise, technical assistance, and coaching around topics such as economic impact analysis and trail user evaluation. According to the Sunflower Foundation, these meetings will be focusing "on budget-friendly, Do-It-Yourself (DIY) strategies to evaluate and demonstrate the value of trails." Other plans include obtaining funding to complete the primitive trail.

Benefits of a trail system include:

- Additional access to other parts of the transportation system and community without the additional cost of developing new rights-of-way.
- An option for community members to engage in a healthy, environmentally friendly, and economical mode of transportation in lieu of motor vehicles.
- Scenic settings for physical activity as many railroads are located along rivers, valleys, and rolling hills.

TREE BOARD POSTER WINNERS

Members of the Tree Board declared winners in the Tree Poster Contest. The first-place winner went to Mollie Deines. Second place went to Natalee Brown and the third-place winner was Madison Zeller.

Community Garden

Applications will soon be available to reserve space at the Lindsborg Community Garden, located at 1st Street and Union Street, next to the Välkommen Trail. The garden was established in 2013 with financial assistance from the Smoky Valley Community Foundation, Bank of Tescott, McPherson County Community Foundation, and Jim and Kathy Richardson. A limited number of 10'x20' plots will be available on a first-come, first-served basis. Interested individuals and families should contact City Hall at 785-227-3355 for more information.

ADVANCED METERING INFRASTRUCTURE (AMI)

In January of 2022, the City of Lindsborg began the process of transitioning from an Automated Meter Reading (AMR) system to an Advanced Metering Infrastructure (AMI) system to collect electric and water meter readings. AMI is often referred to as “smart meter” technology and it is becoming the standard technology that utilities are using for the collection of meter reads. This article is to help explain some of the differences between AMR and AMI and how AMI will benefit the city and its citizens.

The current AMR system is a simple, drive-by collection system and offers only one-way communication from the meters back to the collection device to gather meter reads. This system has greatly reduced the amount of time that it takes to read the meters, but it still requires a meter reader to drive the town to collect the reads. The meter reader also needs to go out and physically collect missed reads and read the meters when someone moves in or out and for utility shutoffs each month. While much more efficient than the old “walk, read, and write” method before AMR, it is still simply just a meter reading system.

What is Advanced Metering?

AMI is a technology system that provides near-real-time data on energy and water consumption and electrical voltages throughout the system via two-way communications between the meters and the utility office. The main components of an AMI system include Hub and Leaf electric meters, water endpoints, and a Meter Data Management System (MDMS). The hub meters collect data from the leaf meters and the water endpoints via radio signals, and then transfer that data to the MDMS using cellular signals. The MDMS software collects all the data and provides many different reports. These reports can be very helpful to the utility and its customers. The system has leak detection to notify city staff about a possible leak at the beginning instead of a cycle of a month or two of reads before it gets noticed during billing. With AMI, there will be no need for a meter reader to drive and collect monthly reads, make trips to collect missed reads, move-ins, move-outs, or shutoffs. Once the AMI system is functional, each of these jobs will be done from a computer in the Utility Office. This saves time, reduces personnel and vehicle expenses, and provides instant reads to utility staff for whatever job they are working on at the time.

One of the largest benefits to the city and its customers will be the Outage Management System (OMS). The OMS monitors all the electric meters, and it knows instantly when an electric meter is without power. The system then notifies electric personnel with an outage report, including all pertinent information. A map of the city can also be displayed showing all electric meters in the system. The meters will have a normal status color of green and those without power would show up red. This will be very helpful after storm events and larger outages to let the electric personnel know exactly who has power and who doesn't. This will help crews quickly identify areas without power instead of waiting for phone calls or simply driving around looking for possible issues. The OMS will allow crews to leave at the end of an outage with peace of mind knowing that they have not missed something and that all customers have power.

During the first phase of the transition, most of the work has taken place in the utility billing department at City Hall. This has been to change how the current billing system will receive data from the new MDMS. **This change is all internal and your monthly utility bill will look the same.** There has also been an extensive amount of training with the utility billing department, as well as the electric and water departments, about the installation and programming of the new electric meters and water endpoints.

The installation of the new meters is scheduled to begin this summer with the entire installation process taking four to six months to complete. **Any interruptions to service during this process will be short and you will be notified before your meter is upgraded.**

The benefits of AMI, such as the outage management system and leak detection, are going to greatly enhance the service that the City of Lindsborg provides to its customers.

Benefits of AMI:

- Reduces operational costs and enhances customer service;
- Provides more detailed information about consumption of electric and water;
- Acts as an outage management system for faster detection of electric outages; and
- Provides early detection of water leaks.

Winter Walk Across Kansas

The Lindsborg Recreation Department began a “Winter Walk Across Kansas” on October 1 with 27 teams of two joining in on the fun. The goal was to “walk” 424 miles from the Kanorado State Line to the Leaving Kansas Attraction between Kansas and Missouri. There are three “stops” along the way that each team is trying to reach to help them achieve goals throughout the program and get rewarded with prizes. Each team turns in their mileage weekly and receives emails about how far they have gone and updates of how many miles they have left to finish.

The first “water break” was Cedar Bluff State Park in Trego County; this was 128 miles into the journey. They continued walking and after hitting the 248-mile marker, they had arrived for a cooldown at Mushroom Park, Kanopolis State Park. Another 70 miles down the road is the State Capitol; each team couldn’t resist the 296 steps that lead you to the top. To finish the trek, and make it all the way to the end, was 424 miles. These miles were based on a direct line on interstate. The goal was to grab a partner to keep you accountable and work together to walk/run/bike/or do 15-minute activities that help you reach your goal. This walk ends at the end of February for a total of 22 weeks. The intention is to get yourself in a habit of exercising weekly and being aware of the little things you can change to help be healthier.

We have 27 teams registered (54 participants) and 11 teams have completed the journey of “Walking Across Kansas” at this point. There are many teams who are on track to finish by the end of February. The Recreation Department applied for a grant through Smoky Valley Community Foundation and was awarded the money needed thanks to the Kansas Health Foundation Fund to provide incentives along the way. It has been a fun program and I look forward to building on it in the future.

Basketball 2021-2022 Season

Recreation basketball season included students K-6th grade.

A Joyful Yet Chilly New Year’s Tradition

On January 1 of each year, (rain, snow, or shine) the Lindsborg Golf Course has golfers; a tradition that approximately 40 years ago for some continued into 2022. The goal for this group is to play nine holes, but dependent on weather, they may just tee off. For the new millennium, this group of guys even headed out at 12:15 a.m. to hit ceremonial tee shots in the dark.

A second group has also started golfing on the 1st of January. They have been following this tradition for at least 10 years and always try to play at least six holes but have had years they played all 18. With temperatures of 11 degrees, snow flurries and 15+ mph winds, the group wrapped their golf carts, placed heaters inside, and played nine holes.

Both groups enjoy getting to be together and play golf to kick off the new year. They are all avid Lindsborg Golf Course golfers and love building this tradition.
