

# Lindsborg Lead and Copper Online Survey

Did you know Lindsborgs' water system is required by the Kansas Department of Health and Environment to sample the water for lead and copper every three years? In the past, sample sites have been chosen because a home meet the criteria to be the most likely to have plumbing which contains lead. New regulations now require water suppliers identify all materials used in the construction of the water system, this includes not only the utility side, but the customers side as well. This means that the Lindsborg Water Department needs your help. Please take a few minutes to complete the survey to the best of your ability to help identify plumbing materials and systems within your home or business. Thank you for your help.

## 1. Was your home built between 1982 and 1989?

- YES  
 NO, built after 1989  
 NO, built before 1982

## 1982-1989: Why this time frame?

The EPA focuses on these years because of the Lead and Copper Rule in the Code of Federal Regulations. However, if we do not have enough homes to inspect between 1982 and 1989, you may be contacted. If you don't know your home's age, you can check your property tax information or other documents.

## 2. Has your kitchen undergone a major remodel or do you plan on having one in the next 3 years?

- YES When was the remodel \_\_\_\_\_ What plumbing materials were used? \_\_\_\_\_  
 NO  
 UNSURE

## 3. Do you have a water filter installed in your house or kitchen?

- YES  
 NO  
 UNSURE

**Note: Your water is safe to drink and meets EPA drinking water standards without filtering.**

## 4. Do you have a water softener installed in your house or kitchen?

- YES  
 NO  
 UNSURE

**Note: Softening is a matter of customer preference, not safety.**

## 5. What type of plumbing materials are used for your outside water service line from your water meter to the point of entry into your home?

- Lead Pipe  Copper Pipe with Lead Solder  Plastic or PVC or PEX  
 Galvanized Iron  Cast Iron  Steel  Other \_\_\_\_\_
